

FUNBI ONAEKO

Ibadan, Nigeria | +2349013413496 | oluwafunbi.onaeko@gmail.com | linkedin.com/in/funbionaeko | github.com/ouujay

PROFESSIONAL SUMMARY

AI Engineer and Full Stack Developer with 3+ years of experience building production-ready applications integrating Large Language Models (LLMs), voice recognition systems, and machine learning pipelines. Proven track record of shipping AI-powered products to 1000+ users, including conversational AI assistants, RAG (Retrieval-Augmented Generation) systems, and recommendation engines. Expertise in Python, JavaScript/TypeScript, React, React Native, Django, FastAPI, and cloud deployment (AWS, Azure). Passionate about building AI solutions for social impact and financial inclusion.

TECHNICAL SKILLS

Programming Languages: Python, JavaScript, TypeScript, Java, C++, Rust, SQL

AI/ML Technologies: Large Language Models (LLMs), RAG Systems, NLP, Voice Recognition, Prompt Engineering, LangChain, Vector Databases, Embeddings, TF-IDF, Word2Vec

AI/ML Models & APIs: OpenAI GPT-4, Meta LLaMA 3.1/3.3, Whisper, ElevenLabs, Together AI, DeepFace, speechbrain, Vosk

Backend Frameworks: Django, Django REST Framework, FastAPI, Flask, NestJS

Frontend Frameworks: React, React Native, Next.js, Vite, Tailwind CSS, Framer Motion

Databases: PostgreSQL, MySQL, SQLite, Redis, ChromaDB, Supabase, Vector Databases

Cloud & DevOps: AWS, Azure, Docker, Git, GitHub Actions, CI/CD, Vercel

APIs & Integrations: REST APIs, WebSockets, Paystack, WhatsApp Business API, Africa's Talking

PROFESSIONAL EXPERIENCE

Founder & CEO | UniOrdering (OrderingPau)

Ibadan, Nigeria | January 2024 - Present

- Founded and scaled AI-powered multi-vendor delivery platform to 1,016+ active users across 3 Nigerian universities.
- Architected and deployed AI recommendation engine increasing average order value by 25% through personalized suggestions.
- Integrated LLM-powered chatbot (Llama 3.3 70B) enabling natural language ordering, reducing checkout time by 40%.
- Built complete marketplace ecosystem serving customers, 15+ vendors, and delivery partners with real-time tracking.
- Managed end-to-end product development, cloud infrastructure (AWS/Azure), and achieved 95%+ order fulfillment rate.

AI Engineer | EchoPay (Hackathon Team)

Remote | November 2025

- Led AI/ML integration for voice-driven banking assistant targeting 52M+ underserved Nigerians.
- Built end-to-end voice pipeline: Whisper (STT) → LLaMA 3.1 (intent) → GPT-4 (reasoning) → ElevenLabs (TTS).
- Implemented 3-factor biometric authentication using voice embeddings (speechbrain/ECAPA-TDNN) with 90%+ accuracy.
- Developed anti-deepfake detection system using spectrogram analysis and micro-variation pattern detection.

Machine Learning Intern | Robotics Artificial Intelligence Nigeria

Remote | June 2022 - Present

- Developed client-churn prediction model using Python, scikit-learn, and XGBoost achieving 87% accuracy.
- Ranked 5th out of 1,000+ participants in Zindi machine learning competition.
- Built data pipelines for preprocessing, feature engineering, and model evaluation.

Technical Lead | AI SMS/USSD Chatbot Platform

Remote | April 2025 - Present

- Leading development of AI chatbot accessible via SMS/USSD for low-connectivity Nigerian communities.
- Implemented NLP query processor with session management serving users without internet access.
- Designed credit-based monetization model for sustainable telco partnerships.

TECHNICAL PROJECTS

• UniBot - AI Ordering Assistant | Python, Django, React, LLaMA 3.3, Together AI

- Built conversational AI chatbot enabling natural language food ordering ("I want rice and chicken").

- Integrated Meta LLaMA 3.3 70B for intent recognition, entity extraction, and context-aware responses.
 - Implemented real-time cart management, checkout automation, and wallet payment processing through conversation.
 - Solved LLM hallucination issues by injecting real-time database context (cart, products, balance) into prompts.
- **EchoMind (VoiceRAG) - Voice Document Q&A; | FastAPI, React, Vosk, ChromaDB, RAG**
 - Built voice-powered document Q&A; system using Retrieval-Augmented Generation (RAG) architecture.
 - Implemented hybrid embedding system combining TF-IDF + Word2Vec for 85%+ retrieval accuracy.
 - Created two-pass LLM pipeline: voice cleanup pass + RAG search pass for robust query handling.
 - Integrated offline speech recognition (Vosk) for privacy-focused, low-latency voice input.
 - **EchoPay - Voice Banking Assistant | React Native, FastAPI, Whisper, LLaMA, GPT-4**
 - Developed voice-driven mobile banking app with floating overlay UI and wake word activation ("Hello Echo").
 - Built multi-modal authentication: voice biometrics (192-dim embeddings), Face ID, and mandatory PIN.
 - Integrated end-to-end AI pipeline achieving <3 second response latency for voice commands.
 - Implemented anti-deepfake detection using audio spectrogram analysis and breathing pattern detection.
 - **Foka EduStudy Platform | React, React Native, Django, RAG, AI Quiz Generation**
 - Built AI-powered education platform generating quizzes and flashcards from uploaded course notes.
 - Implemented RAG system extracting relevant content from PDFs for contextual quiz generation.
 - Developed cross-platform mobile app (React Native) with offline study mode and progress tracking.
 - **UniOrdering Platform | Django, React, PostgreSQL, Redis, Paystack, WhatsApp API**
 - Architected multi-vendor marketplace with AI recommendations serving 1,016+ users.
 - Built shop owner dashboard with real-time analytics, inventory management, and payout system.
 - Developed delivery partner system with route optimization and earnings tracking.
 - **Spill - Women's Safety App | React Native, Django, Flask, DeepFace, AI Verification**
 - Built anonymous safety app with AI-powered gender verification using DeepFace facial analysis.
 - Implemented location-based feed system and content moderation for user safety.
 - **MedPortal - Healthcare SaaS | Django, React, JWT, PostgreSQL**
 - Built full-stack healthcare platform with RBAC for patients, doctors, and admins in 5 days.
 - Implemented subscription-based rate limiting and appointment management system.

EDUCATION

Bachelor of Science in Computer Science

Pan-Atlantic University, Lagos, Nigeria | Expected December 2026

CERTIFICATIONS

- Kaggle: Introduction to Machine Learning
- PAU Industry Readiness Programme
- OPSWAT: Introduction to Critical Infrastructure Protection (ICIP)

ADDITIONAL INFORMATION

- Languages: English (Fluent), Yoruba (Native)
- Interests: Artificial Intelligence, Machine Learning, LLM Applications, Voice Technology, Financial Inclusion, EdTech
- Achievements: Zindi ML Competition Top 5 (1,000+ participants), 1,016+ platform users, 15+ vendor partnerships
